GGC Expands its capabilities with new Tilt-Up Project....

GGC has enjoyed a budding relationship with Hoar Construction out of Birmingham, Alabama. We are currently about 75% complete constructing the future home of the Madison/Rocket City Trash Pandas (AA Minor League Affiliate of the Los Angeles Angels). Due to such a successful performance in Madison, GGC was recently awarded another project with HOAR Construction. We broke ground early June on a 140,000SF tilt-wall concrete building addition to their McCalla, Alabama plant. This is GGC's first tilt-wall project and we are excited about expanding our capabilities. As of July 1st, we have poured half of the slab on grade, and begun tilt layout and formwork activities. By the first week of August, GGC's team of Ronnie Baker, Larry Dempsey, Brian Pulley, and Ian McMillan should have 30+ tilt pales standing. GGC's strategy is to continue to build our bread and butter structural work, while selectively continuing to add to our capabilities in an effort to bring more turnkey value to our clients.

GGC Earns Associated Builders & Contractors of Georgia STEP Safety Award!

ABC of Georgia awarded GGC the Platinum-level STEP award as well as the Georgia Award of Safety Excellence at the event held on 6/17/2019 in Atlanta. We were also recognized for lower lost time rates equal or lower than half the national average. This is an award we all participated in achieving.
